

PVS Admin Report
November 2008

Additional completion of registration activity is needed to give a more precise report of numbers than what Sumie has sent out. If you have not seen the numbers registered athletes were at 6628 through 10/07 and are at 7302 through 10/08. That is more than a 10% increase. She is finding that the coaches registration process is much more time consuming than before for her and club registrars because the BG screen is required again this year plus the others along with the new STSC requirements (and foundations of coaching test). She is not printing 2009 cards for coaches until the certs. etc. are all in. It would be unfair to some coaches to raise an issue about their status at the Nov Open based on their 2008 cards only (on the SWIMS report there are over 115 expirations shown) so I am not sending anything to meet management about checking cards—they obviously should all be able to show their 2008 proof of registration.

The 2006-2007 penalties on clubs for insufficient officials is wrapped up. 2007-2008 will be handled after the 12/31 data is available. I don't expect penalties of any significance based on my initial analysis in June. No club was short by more than 2 and there was a big improvement overall.

I will have some items at the next meeting on Bylaws and Policies and Procedures based on Convention and updating our documents.
