Suggestion for HY-Tek Purchases

It is recommended that team purchase the compete system (#241) $296.25. This will also include the award label printing option.

If all a team wants is a "bare bone" system, then the basic (#221) for $186.75 should work. However meets will only be able to be run with stopwatches, a team will not have the capability of using any electronic timing systems (automatic or semi-automatic).

Option #252 for $221.25 will need to be purchased to interface with a timing console. But if a team plans to do meets at PGS & LC and want the capability of putting names on the scoreboard then option #254 will also need to be purchased (because it is a different system from the rest of the pools we use).
